

Motivators and Creators Women's Group

Deliberately Achieve Your Goal

1 State your goal:

Example: To Help 50 New Women Entrepreneurs Successfully Market their Businesses by 12/1/15.

2 State your reason (Why?):

Example: I want to help women business owners with effective, affordable, strategic marketing. I have made this my goal because one-on-one, strategic, effective and affordable marketing is not always made affordable and available to many new small business owners due to their limited or non-existing budgets; especially new women entrepreneurs in the first 1-3 years of business. Achieving this goal will be a mutually fulfilling relationship. In short, I to help women business owners achieve the marketing success they need to win in today's marketplace at an affordable and achievable pace.

3 List Every Action You are Currently Taking toward Achieving Your Goal

4 List Every Thought (Feeling) You are Currently Thinking Your Goal

5 Based on the information you have written, contrast and compare your actions and thought surrounding achieving your goal.

6 Write out what you need to add/improve on as well as what you need to continue doing and add them to your **planning sheet!**
