

Determine How Much To Charge

An Effective Tool To Determine Your Hourly Rate

MOTIVATORS AND CREATORS WOMEN'S GROUP

THE Progressive Organization for Women In Business

My Hourly Rate Is.....

Do you know? Do you know what an hour of your time is worth?

Since you cannot manage what you don't measure, here are a few important points to MAKE SURE you have clarity on as you create great wealth:

How much money do you want to make per year?

Then divide that by 12 to get your monthly income.....

Then divide that by 4 to get your weekly income.....

Then divide that by 5 to get your daily income.....

Then divide that by 8 to get your hourly income.....

Then divide that by 60 to get what your minute is worth.....

Now keep in mind, these are not necessarily the rates you charge for your services. Because of course, your goal here is not to be working with one on one clients/customers 40 hours per week.

This breakdown gives you an idea of the structure you will need to stay on track with your financial goals.

(Also keep in mind, for the sake of the exercise; we're working with gross amounts. Please adjust your numbers accordingly for tax purposes).

Now, if you're in a service based business, what is the hourly rate you will charge?
